

AMA-CHEWER

Publication of The Indianapolis Radio Club, Inc.

OCT. 1949

PROGRAMS

- OCT. 7th Illustrated lecture by Corporal Al Huber of the Indiana State Police on "Highway Traffic Safety". This lecture brings vividly to us the need for safe driving on the highway.
- OCT. 14th Regular business meeting of the club. Plan now to attend and discuss matters that keep your club operating at its best. Before long elections will be coming along and you need to know those to put into office to keep your club on its toes.
- OCT. 21st Art Schultz, W9NNX will continue his lecture on "Radio Calculations". This is a series of lectures on the application of everyday math to everyday problems of electricity and radio. You have asked that Art continue these fb talks so here is the second one.
- OCT. 28th Bill Greatbatch of Naval Ordnance Lab. here, formerly with Signal Corps Laboratories, will bring Signal Corps technicolor movies of the eighteen tests of German V-2 rockets at the White Sands, New Mexico proving grounds and also captured movies of the actual launching of the V-2 rockets by the Germans during the war. The title of his lecture is "Tracking the V-2 Rockets at White Sands, New Mexico".
This should be a most interesting meeting. Plan now to attend.
- NOV. 4th Visit to the new 50 KW transmitter of station WIBC. This should be a very interesting visit to this completely new station now in operation in this area.
- NOV. 11th Business meeting of the club.

Meetings unless otherwise stated are held at the Northeast Community Center at 3306 East 30th St. (30th St. and LaSalle St.) Meetings called to order at 8:00 PM CST. Everyone is welcome.

PAST PROGRAMS

As is usual we take you back over the past month to let you know the interesting programs that have been offered at the club. You should make it a point to be at all the meetings so as not to pass up a good program. Sept. 16th Art Schultz gave the first of a series he is to present at club on Math. This was well attended and even though to some it seemed very elementary there were plenty who thoroughly enjoyed it and voted that it be continued. Keep it up Art. On the

23rd of Sept. an inspection trip to WISH was made. Following the WISH tour we visited the new plant of the Earl W. Springer Air Craft Radio Co. We want to thank Harold Trosper for the FB welcome and explanation that he gave the club on the station, thanks again NGS. Earl had open house and the fellows ended up hanging over the edge of his Eurcoupe and hoping for a hop. HI. On the 30th Bob Annis talked on "Slow Speed Recording on Tape". Bob gave a novel talk. He previously had recorded it so he just turned the machine on and sat down. Quite a way to take the weight off one's feet. He passed charts around and drew a curve on the board to show the effects of magnetization. Had he come prepared to sign up orders it seems that he would have made several sales. No fooling though it is a cheap way to record QSO's and just have fun with.

NEW MEMBER

We take pleasure in welcoming the following member into the club: .

Harrison J. Blind, W9DXD

CLASSIFIED

You can list your apparatus for sale in Amachewer. 25¢ for each 3 lines or fraction thereof.

FOR SALE: One 12DP7, call Atlantic 4115.

OTHER CLUBS

Ye editor receives papers from The TriState Amateur Radio Society at Evansville, Ind. It is a well made up sheet and is full of news., contests, reports, and activities. They must surely have more pep than we can muster. Their copies will be posted as they arrive so read through them when you see them on the bulletin board. W9DGA, Clifford C McGuyer is the editor.

The Muskegon Radio Club publishes a sheet but ye editor has not seen one the past month. By the way where is our copy of the Cincinnati Radio Club's paper getting to. They put out a very FB sheet or book each month and it is well made up and printed.

NEW EQUIPMENT

The club has just purchased a used Mimeograph which instead of being hand cranked is motor propelled. That means something when you feed some 500 to 1000 sheets of paper into each issue of Amachewer. What is more important is that it has a self feed and a positive feed at that. Now all that will do good if-if-ye-editor-did I say editor-ye publisher can learn to operate all hte gadgets on the machine. It says ther that you push the little valve down and, well that is what it says. What ye ed needs now is a typewriter that moves forward for each letter and one especially that spells words correctly and by its self.

The very fact of having acquired this new (new to us) machine means among other things that newer stencils can be secured that are not supplied for the older machine that had been used up to now. A trial run making use of such a stencil is supplied in this issue. You recall that the club had voted to supply a Marion County or City and membership list of hams to its members. Now this can go forward because up till this time the ed had no way of putting a stencil in his portable typewriter to make up such an arrangement. Let me know if it you suits you and we will go forward with the listing.

Experiment number 1

IDNAIANPOLID RADIO CLUB CITY HAMS

THE following list of amateurs is compiled from a list of hams supplied by the Chicago office of the FCC, from a list taken from the call book by Norman White, and by cross check with the membership list of the Indianapolis Radio Club.

W9ABV - W9APG

W9ABV Ray W. Titchcock W9AKI Clifford Riggsbee

W9ACX W9AKP Philip Keddedy

W9AEA Merrill Lindley W9AMV Al Ricketts

W9AHU Russel Watson W9APG Harold Ferguson

Then by names

ANG - BRA

Angus, D. J. 310 N. Illinois W9CYQ

Annis, R. B. 1101 N. Delaware RI 2838

Ashlock, H. D. 1540 Logan St.
Noblesville, Ind. 51404 W9TD

Louis C. Bergenroth 4069 Elizabeth W9KQG

Bicknell, Ray E. 6302 E. Wash BL8433 WAOZ

Brabender, Carl 2427 N. Talbot WS2385 W9NJ

Bramblett, G. E. 3722 N. Drexel CH W9POF

and so on. Quite a job it is
to be as you can see so- Volunteers wanted.

So far, can't do any more that say that I have tried. 1st sheet out side of having too little room to get too much on and then punching a hole through the stencil because this little machine has horns on it that do not fold down can't say that we cannot go on for a touch down.

Contributors You, when prodded enough. How about some more without so much prompting.

End of experiment. Comments!

CONTRIBUTED

Esther, in a QSO the other nite got confused with 73 & 88 and now signs with 83 ! Alvey Pittman W9JJC

Anybody want a 5 Radar Scope tube? will work FB as a potato masher. W9JJC.

W9CKB is still QRL traveling Kentucky in September, Colorado in Oct. The 522 ought to be on the air by Christmas with good luck. JIM

We Welcomed W8ZJT, George Bloomquist of Youngstown Ohio to our meeting Sept. 30th. Come again George.

On the Net last Sunday, ASJ jammed CMO- really fouled him up. Hi.

From Joe Brand visiting us Friday the 30th. - Glad to visit with the boys, wonder why I can't hear more follows on 20 from around here; I expect to have a kilowatt(pair of 810's) on 20 & 75 phone shortly. (maybe 40 CW HI HI). Joe Brand W5PSU

W9APJ is trying to get on 420 MC and would appreciate someone to talk to when he gets it going.

Anyone willing to provide a good home for one to five Angorra kittens contact W9DPL, CH 5093

W9FYR who operated one of the tricks at the Fair Grounds is quite a salesman. Some one said he was now selling milking machines.

Hall, W9ASJ recently handled a valuable msg.- took it from W8DXJ, Grayling, Mich to an Indpls mother whose son is in the army-"Please send me ten bucks". Two dollars a word.

When W9ASJ got on the air in May, he built the power supply bread board. Moved to new QTH in July and put it up cabinet style with nice panel and all. Ho Workie! /Chased circuits for a week. No find trouble. Doc Forbes comes out and we (ED-HE) finds that the 866's had lost their man-hood.

A new glass for TV picture tubes contains no lead and will therefore be lighter and cheaper to produce. Corning it might be said is shaking the lead out of its glass.

TV complaints. My picture has slipped down on the screen, please send some one to push it up.

WWhat is this, the food business? My service man says I have a herring bone in my picture from a ham. I bought a television set- not a refrigerator.

Bob Haskins, Don Vauvel, and Paul Moffett from Shortridge Radio Club, the Frequency Club, visited the IRC last Friday, the 30th of Sept. We have promised them some help in getting programs and their ham station to going. Welcome fellows and bring out the rest of your club to our meetings at any time.
